

## Case Study

### *Interlink Drive Factories*

**Client:**

**Scope:** Factory Floors, Precast Panels, Driveways and Groundworks

**Location:** Interlink Drive, Craigieburn

**Comment:**

ACM concrete is regularly used for factory floors and larger scale construction. This project involved the construction of several factories for small to medium enterprise in Craigieburn. Over 600m<sup>3</sup> of 32MPa Grade concrete was supplied for large floor areas with burnished finish, precast panels, car parks and driveways.
